is_subseq

check if query string is subsequence of base string or not

input:
    first get number of test case <= 300
    each test case get base string (len <= 3000)
    next line get number of query <= 300 for each query get a
    query string
    all alphabet is in [a..z]
output:
    answer from query

example input:
2
ynqtvrnzaq
4
vq
vvq
k
nrn
skqeejxzgv
3
skqx
cz
e
example output:
Yes
No
No
Yes
Yes
No
Yes
